Yankee Rowe
Spent Fuel Storage & Removal
Community Advisory Board
Charter
May 2011

PURPOSE

The Yankee Rowe Spent Fuel Storage & Removal Community Advisory Board (SFSR-CAB) is established as a non-regulatory body to promote and enhance open communication, public involvement and education on the interim storage of spent fuel and high-level waste at the former Yankee Rowe plant site and to advocate for its prompt removal as required by federal statute and contract with the U.S. Department of Energy.

The Board is an outgrowth of its successful predecessor, the Yankee Rowe Community Advisory Board, which served an integral role in addressing community issues and monitoring the decommissioning of the Yankee Nuclear Power Station from 1998 until the project was completed in 2005.

The SFSR-CAB will function as an advisory board to monitor interim spent fuel and high-level waste storage at Yankee Rowe and to monitor and advocate for government actions and progress related to the removal of nuclear waste from the Yankee Rowe site. In addition, the SFSR-CAB may elect to establish and maintain communication with other spent fuel storage advisory boards regarding spent fuel storage, removal and transportation issues.

Yankee Atomic will consider the advice or recommendations made by the SFSR-CAB, and although not obligated to follow such advice or recommendations, will, in the case of a disagreement, provide an explanation for the Company’s approach to the issue.
